**All patients are advised under New York State Law to consult a physician regarding the condition or conditions for which they are seeking acupuncture, naturopathy and hypnosis treatment. In addition, patients are responsible for seeking the advice and treatment of a physician should their symptoms change for the worse, or should a new condition arise.

Many insurance policies do cover acupuncture care but this office makes no representation that yours does. Insurance policies may vary greatly in terms of deductible and percentage of coverage for acupuncture care. Because of the variance from one insurance policy to another, we require that you, the patient, be personally responsible for the payment of your deductibles,

INFORMED CONSENT

I consent to any treatments and related procedures, associated with any services, by Dr. Colleen Gagliardi, ND, LAc, CCH I have discussed the nature and purpose of my treatment with her and I understand that the methods of treatment may include but are not limited to acupuncture, naturopathy and hypnosis, herbal medicine, moxibustion, cupping, gua sha, and electrical stimulation.

I have been informed that acupuncture is a safe method of treatment, but that it may have side effects, including bruising, tingling, numbness or mild pain near the needling sites that may last a few days, and dizziness or fainting. Bruising is a common side effect of cupping and gua sha. An unusual risk of acupuncture includes spontaneous miscarriage, nerve damage, and organ puncture. Infection is another possible risk, although this office uses only sterile, disposable needles while maintaining a clean and safe environment. Burns and scarring are potential risks of using moxibustion. I understand that while this document describes the major risks of treatment, other side effects and risks may occur.

I do not expect the acupuncturist to be able to anticipate and explain all possible risks and complications of treatment. I wish to rely on the acupuncturist to exercise judgments during the course of treatment, and decide what she thinks is in my best interest, based upon the facts that are known at the time.

Since everyone responds to acupuncture, naturopathy and hypnosis treatments differently, outcome of the treatment cannot be guaranteed. Some individuals may experience total or partial relief of their pain or symptoms after the first few treatments, while others may notice a steady, gradual improvement. In some cases, no relief may be felt at all until after several days go by. Some people may notice that their pain actually seems to be worse before it gets better.

I will notify the acupuncturist, who is caring for me, if I become pregnant.

By voluntarily signing below, I show that I have read or have had read to me, this consent to treatment. I have been told about the risks and benefits of acupuncture and other procedures and have had the opportunity to ask questions. I intend this consent form to cover the entire course of treatment for both the present condition and for any future conditions for which I seek treatment(s).
